

Seal service

We offer a full service of:

- mechanical seals manufactured by ANGA, with the possibility of servicing at the customer's plant,
- mechanical seals by other manufacturers,
- sealing heads,
- dividing heads,
- slide bearings of silicon carbides (SiC) and other materials,
- labyrinth sealing systems.

The benefits of cooperation with ANGA service are as follows:

- over 30 years experience in the manufacture and regeneration of mechanical seals,
- qualified and experienced expert staff,
- short completion dates (lead-times),
- own production of sealing rings from carbon composites, sintered silicon carbide and other materials,
- regenerated sealing units are tested in a specialist testing station,
- reports from compact (cartridge) seal tests,
- specialist equipment resources for manufacturing and regeneration of mechanical seals.
